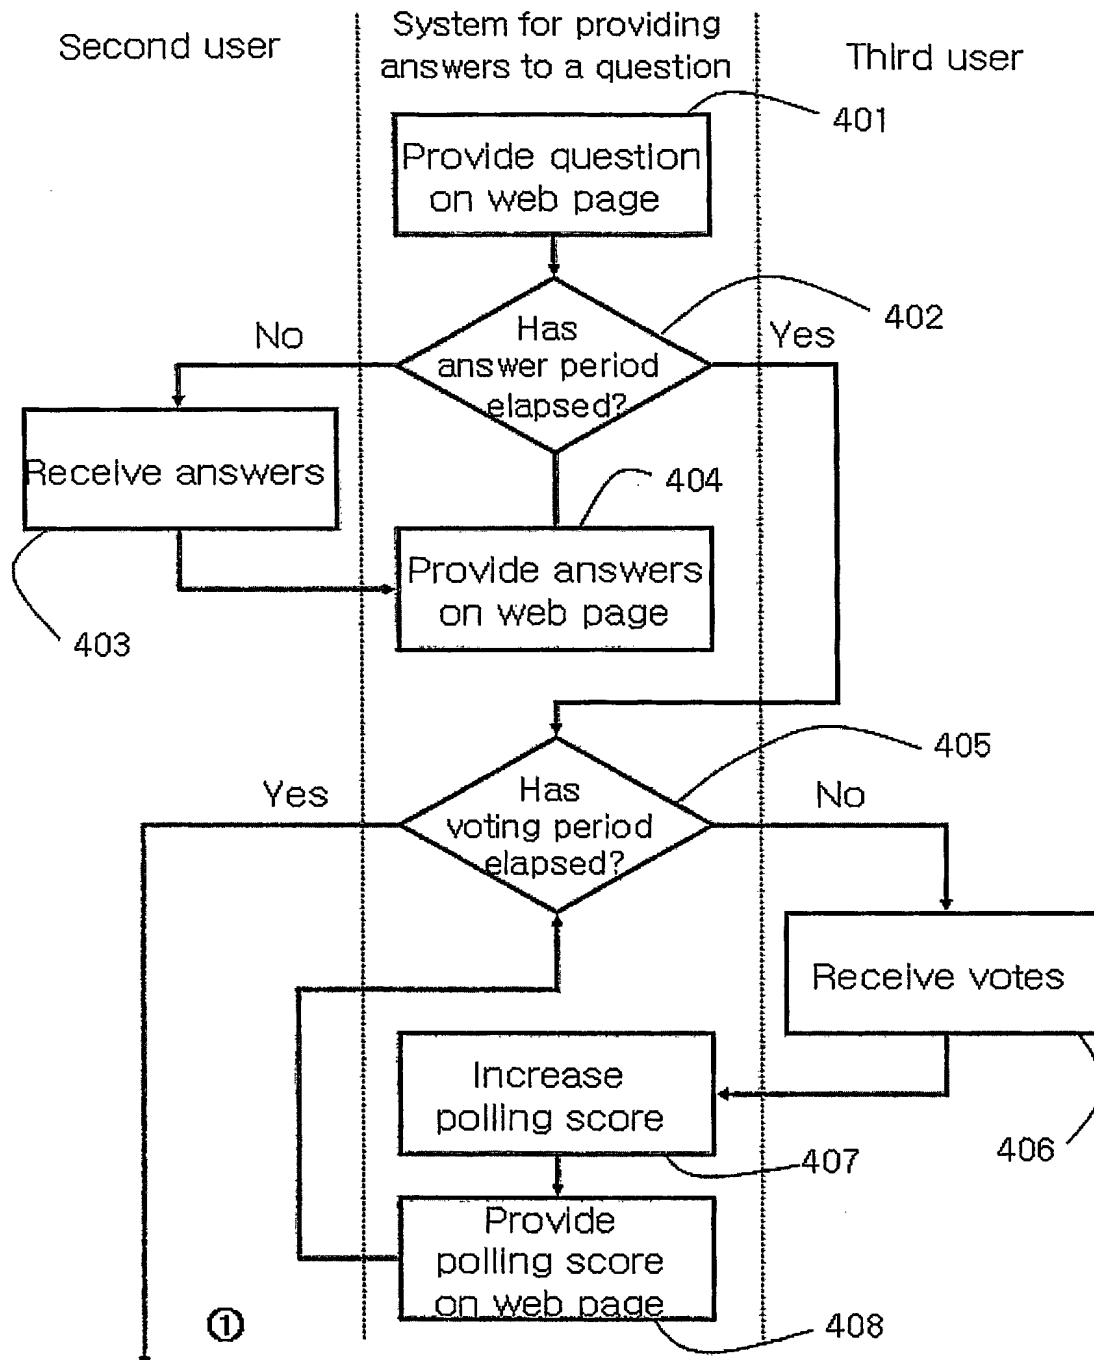

FIG. 3

The figure shows a web-based Q&A interface. At the top, a dashed box labeled 301 encloses a header area containing a question, a score of 75, and a compensation point of +100. Below this, a row contains the text 'Answer impossible/voting period: 5 days left' and 'Compensation point'. The main content area is divided into sections: a question section (302) with the text '[Question] I think the cursor is abnormal.', an answer section (303) with the text '[answer]', and two more answer sections. The first answer section (304) is labeled 'Contents of question (omit)' and has a vote count of 26. The second answer section is labeled 'Contents of answer (omit)' and has a vote count of 7. The text '(omit)' appears to be a placeholder for the actual content.

301	
[Question] I think the cursor is abnormal.	▼75 +100
Answer impossible/voting period: 5 days left	Compensation point
302 Contents of question (omit)	
303 [answer]	
304 Contents of question (omit)	26 votes
Contents of answer (omit)	7 votes
